PROFILE

Dedicated Computer Science engineer with 2 years of experience as a Senior Analyst specializing in data analysis tools tailored for pharmaceutical clients. Demonstrated expertise in optimizing data analysis workflows, resulting in a notable 20% efficiency enhancement through the implementation of automation scripts within Informatica Power Centre. Acknowledged twice as a Rising Star for consistently surpassing performance expectations and showcasing outstanding problem-solving capabilities.

WORK EXPERIENCE

Sr. Analyst

Capgemini Pvt. Ltd., Bangalore

07/2021 – 07/2023

- Facilitated WSR calls with System Leads to monitor team performance for German clients within the EMEA region.
- Conducted thorough reviews of project documentation, implementing crucial updates to align with project requirements.
- Spearheaded the development of ETL enhancement features, enhancing product functionality and performance.
- Investigated application issues, pinpointing root causes and implementing troubleshooting methods for intermediate issue resolution.
- Demonstrated expertise in Oracle database management, encompassing packages, procedures, triggers, views, and tables. Proficient in backtracking tables, analyzing data flow architecture, and identifying and resolving database-related issues.
- Proactively monitored services and provided production support to ensure continuous system functionality.
- Played a key role in efficiently resolving critical issues within stipulated timeframes.

Internship Trainee

Lotus Quality Assurance, Hanoi

01/2020 – 03/2020

- Contributed as a Full Stack Developer, enhancing the organization's appeal by designing an engaging registration page.
- Spearheaded multiple projects including the development of an online poster shopping platform and the creation of a chess game utilizing object-oriented programming principles such as inheritance and abstraction.
